

Electric Electrically driven wheelbarrow

Safety handles ergonomically shaped
Handles made of natural rubber with knuckle protection
Easy handling due to sliding handles

Few parts

Reduced lifting weight at full load
250Kg payload
Easy to manoeuvre
Low noise
Infinitely variable speed control
Operation by forward and backward movement
Motorised assistance can be adjusted via push force
Reduction of physical strain
Bridging steep slopes

Lifetime: 500 cycles up to 70% capacity (at 0%-100% load)
Lifetime: up to 10,000 cycles at 70% capacity

Short charging time
Up to 8 hours operating time
Lithium-ion battery
Charging time approx. 3 hours
Battery charges when driving downhill
IP65 protection class

Extra wide PU tyres
Driveable through soft ground
Stainless steel rim
Gearless

Deep trough
Flat trough
Aluminium tubular frame with matt black coating
Aluminium tubular frame powder-coated in RAL colour of choice
