

## Space and planning systems

Undisturbed telephone calls, meeting colleagues for a smoke break, a short meeting while standing meeting standing up, customer talks at the trade fair stand or even as a waiting waiting zone - the lounge is the elegant solution for many requirements, whether indoors or outdoors, for temporary or permanent use. indoors or outdoors, for temporary or permanent use.

**Dibond panel  
freely printable**

Included in the lounge is:

- 1 disinfectant dispenser
- 1 ashtray
- 2 Schuko sockets
- 1 LED panel
- 3 bar stools

The systems have a dimension of 2x2x2.4m and a weight of 1.35t.

The surface can be configured in galvanised without powder coating, as well as with powder coating in black matt or RAL colour of your choice.

The plan house is the stylish alternative to the conventional construction container. It can be placed in a central location on a construction site, but can also be moved without great effort, depending on the effort. This increases flexibility and enables short distances for the site management and the employees when it comes to construction meetings or inspection of construction plans plans.

**Glass front**

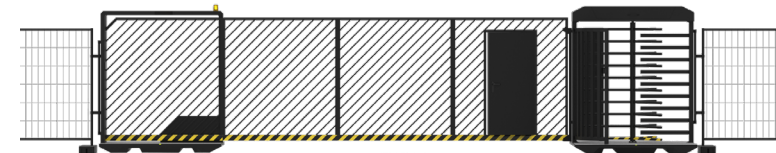

Included in the plan house is:

- 1 shelf
- sitting and standing work surface
- 2 Schuko sockets
- 1 LED panel

## Turnstile with local RFID access control

The turnstiles can be configured with or without RFID access control. The turnstiles with access control include single or double-sided local access control as well as double-sided RFID access control with terminal.

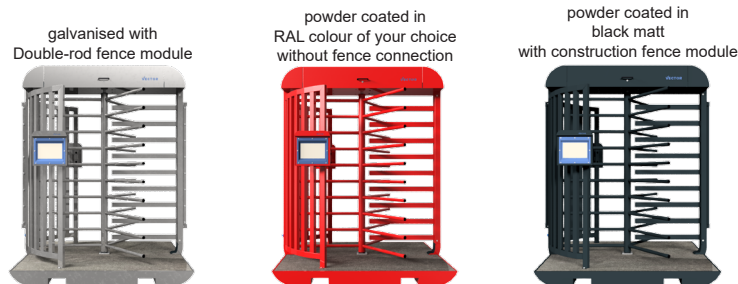

The turnstile has dimensions of 2x2x2.4m with a weight of 1.2t. This allows the structure to be loaded when assembled.

Fences can be directly connected to the turnstile by connecting construction fence and double-rod fence modules. This makes the superstructures mobile as well as stationary.

The turnstile can be configured in various finishes, including a galvanised surface, powder-coated in matt black or in a RAL colour of your choice.

The system can be extended with ramps, disinfection dispensers, etc.

## Turnstile with IoT solution

## Protection and control systems

The protective tunnel has a dimensions of 2x2x2.4m and a weight of 1.3t.

The turnstile tunnel has a dimensions of 2x2x2.4m and weight of 1.5t.
