

## V-Turnstile without access control

### possible application fields

---

Sports field  
Outdoor pool  
Smaller building site  
Playground

### Mechanical control unit (on request)

---

The purely mechanical control unit is supplied without power connection and can be opened in both and can be opened and locked in both directions with a key.

### electromechanical control unit (standard)

---

The electromechanical control unit has a CEE connection for 230V and can be opened and closed in both directions by a locking cylinder.

and can be opened and closed in both directions by means of a locking cylinder. In the event of a power failure or purely mechanical use, one direction can be locked and the other direction can be freely rotated.

Compared to the purely mechanical variant, the electromechanical variant can be supplemented with an access control system afterwards. The access controls offered by us can be access controls offered by us can be used or the customer's own systems can be integrated.
